

Select Customer List

Since its start in 1990, Leader Gasket has gained the confidence of some of the most recognized names in the processing industries of the United States and Europe. As a policy, Leader Gasket sells exclusively through distributors around the world (with the exception of in the small market of Slovakia). This marketing strategy makes it difficult at times for Leader Gasket to know the end users of our products. Nevertheless, from time to time we receive feedback from the end users concerning the quality of our parts and services. The exhibits on this page show some of the known end users.
